Welcome to the demo

NARRATION

Welcome to the demo. UnderCroft is an app to store your personal details such as account, legal documents and who to contact in the event of your demise

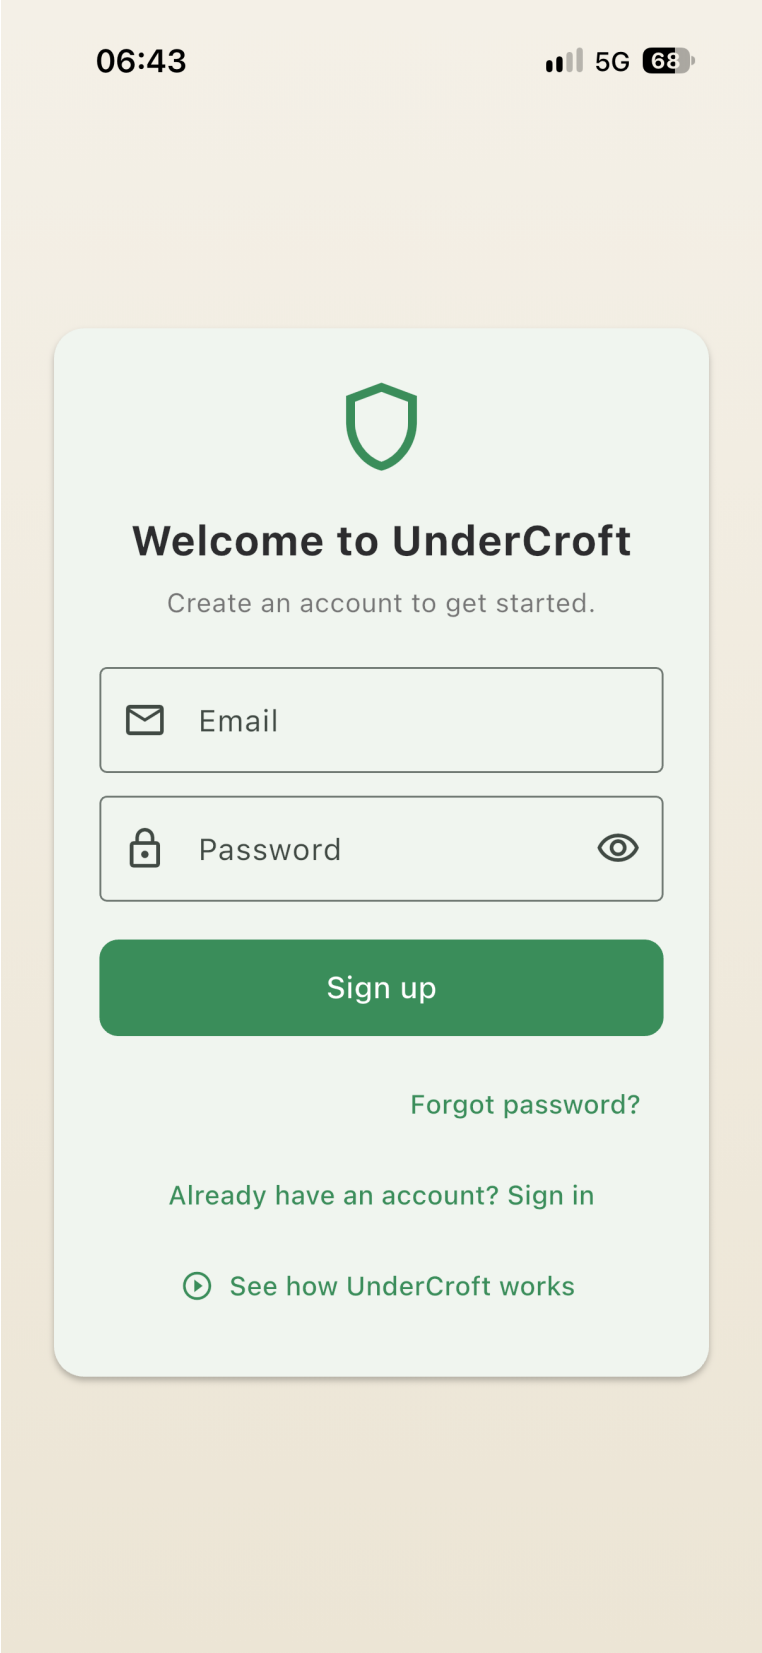

Sign up

NARRATION

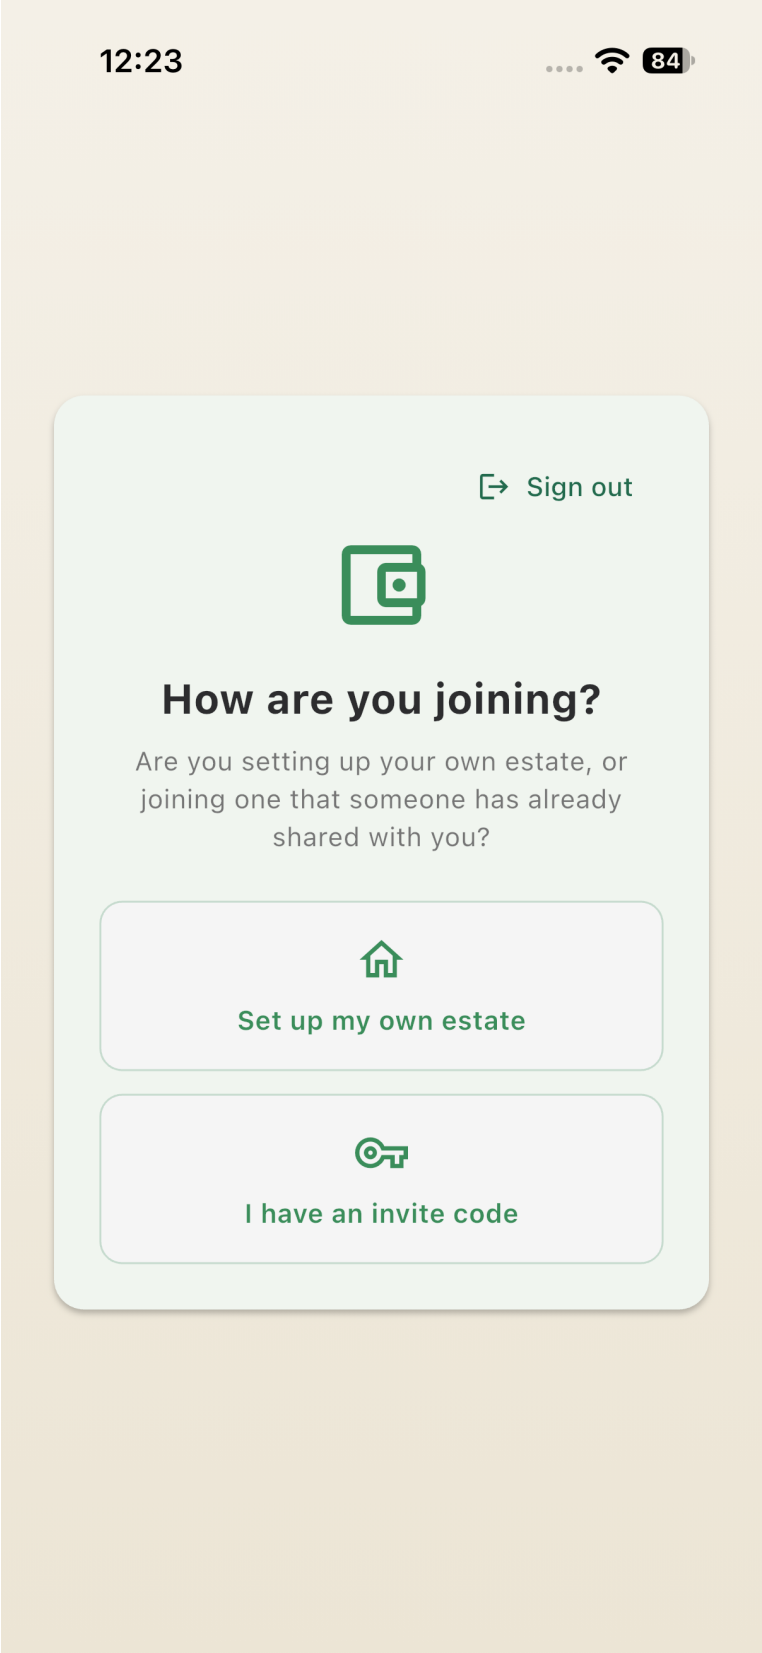

UnderCroft supports two roles - an estate owner, and an executor. For now, lets just get started

Enter email and password

NARRATION

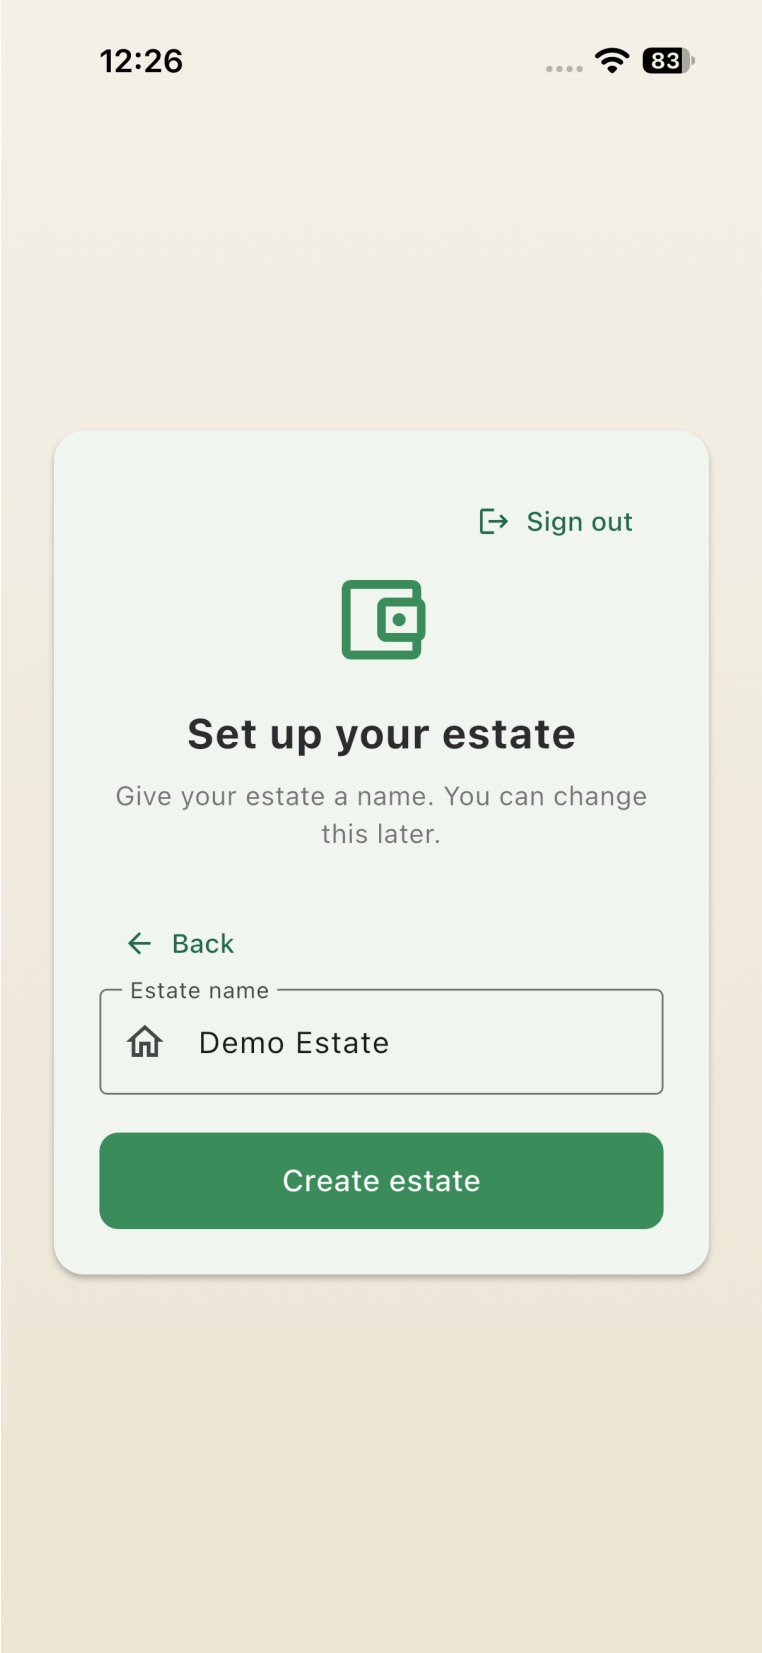

You can enter your email and a secure password here, then Sign Up

NARRATION

Here you choose whether you are the estate owner, or an executor with an invite code

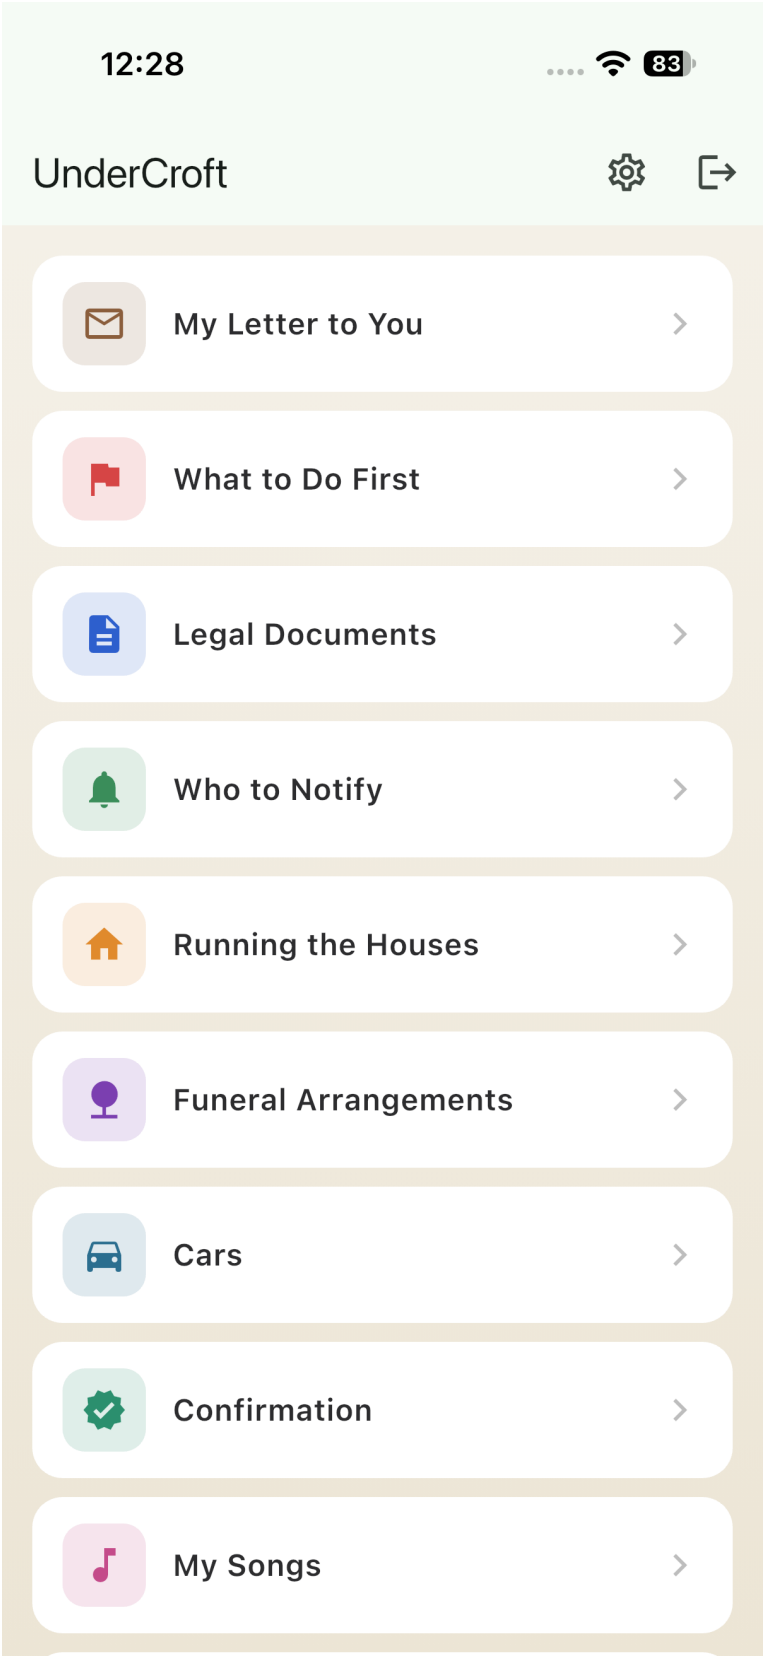

Estate name

NARRATION

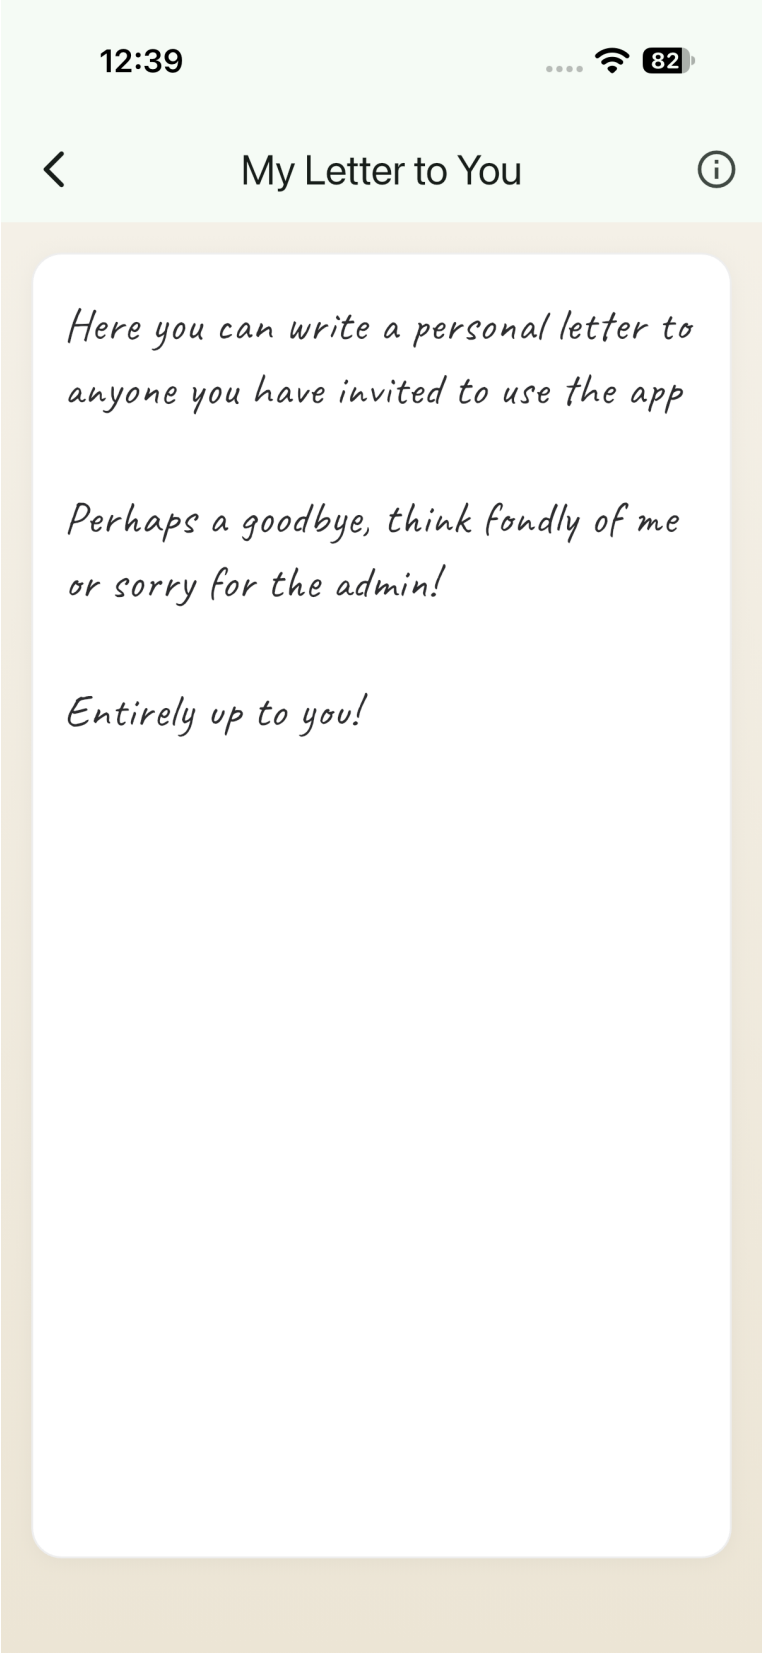

Here you add your estate name. You can change it later in Settings if you want, then Create Estate

Main screen

NARRATION

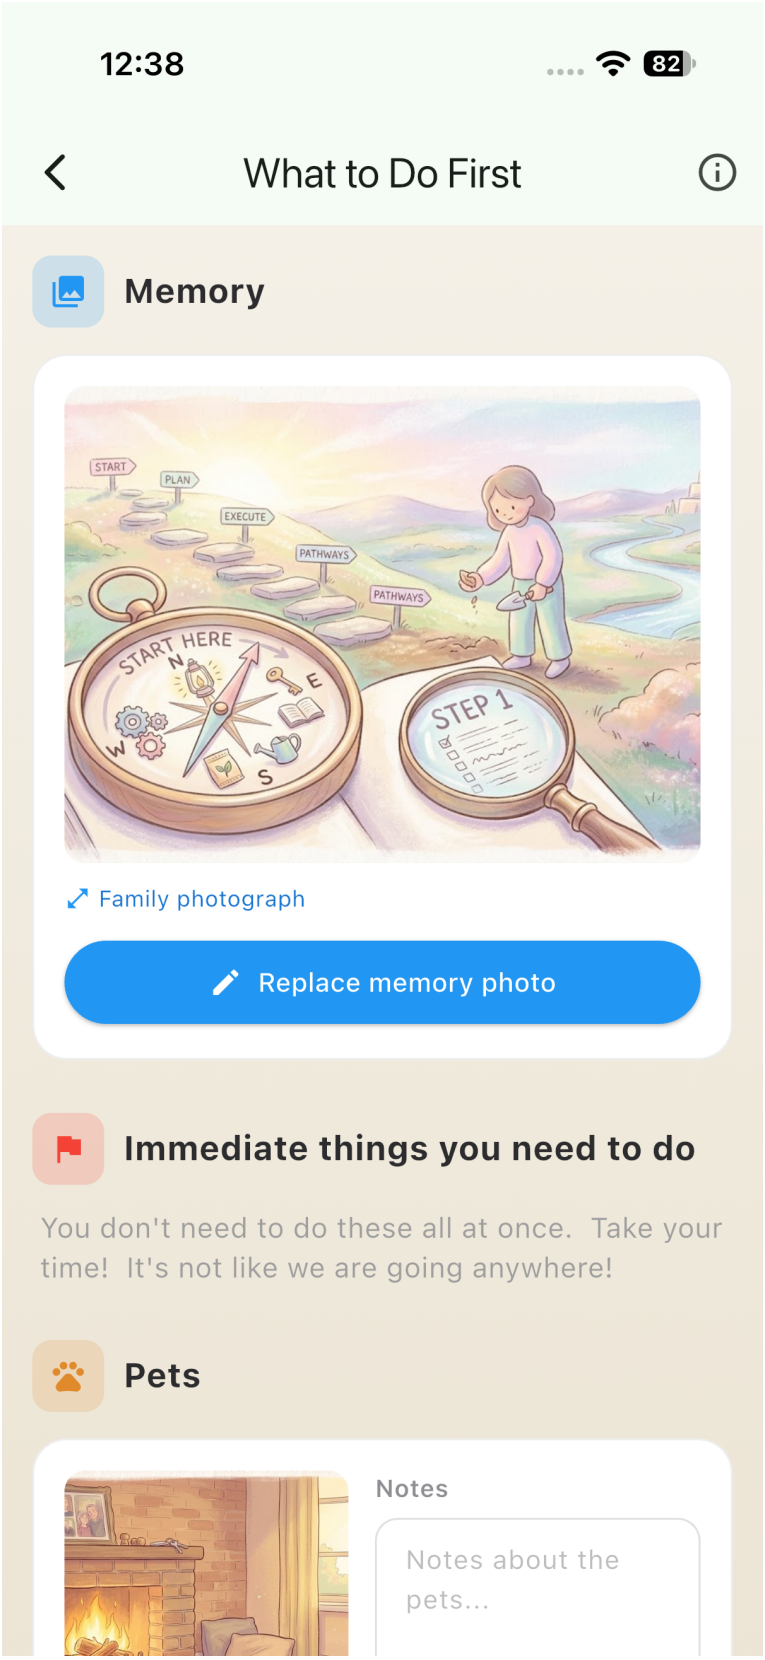

This main screen has all the key sections, in one place. We'll go through these in turn

NARRATION

here you can write a letter to anyone you have invited to use the app

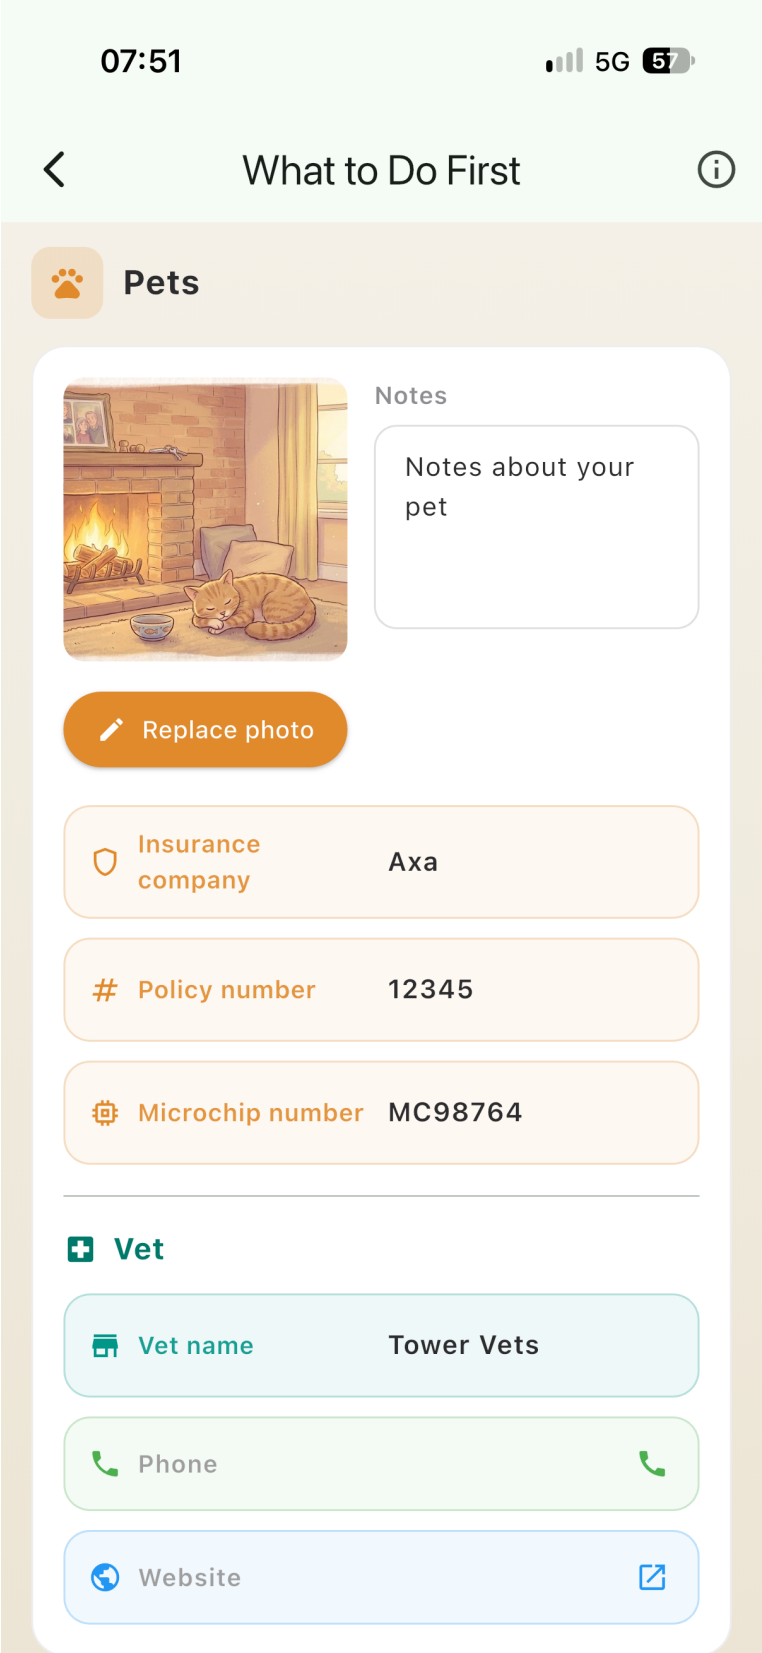

What to Do First(1)

NARRATION

In all the screens, you can change the "Memory" photo with one of your choice. This screen is a list of things to do

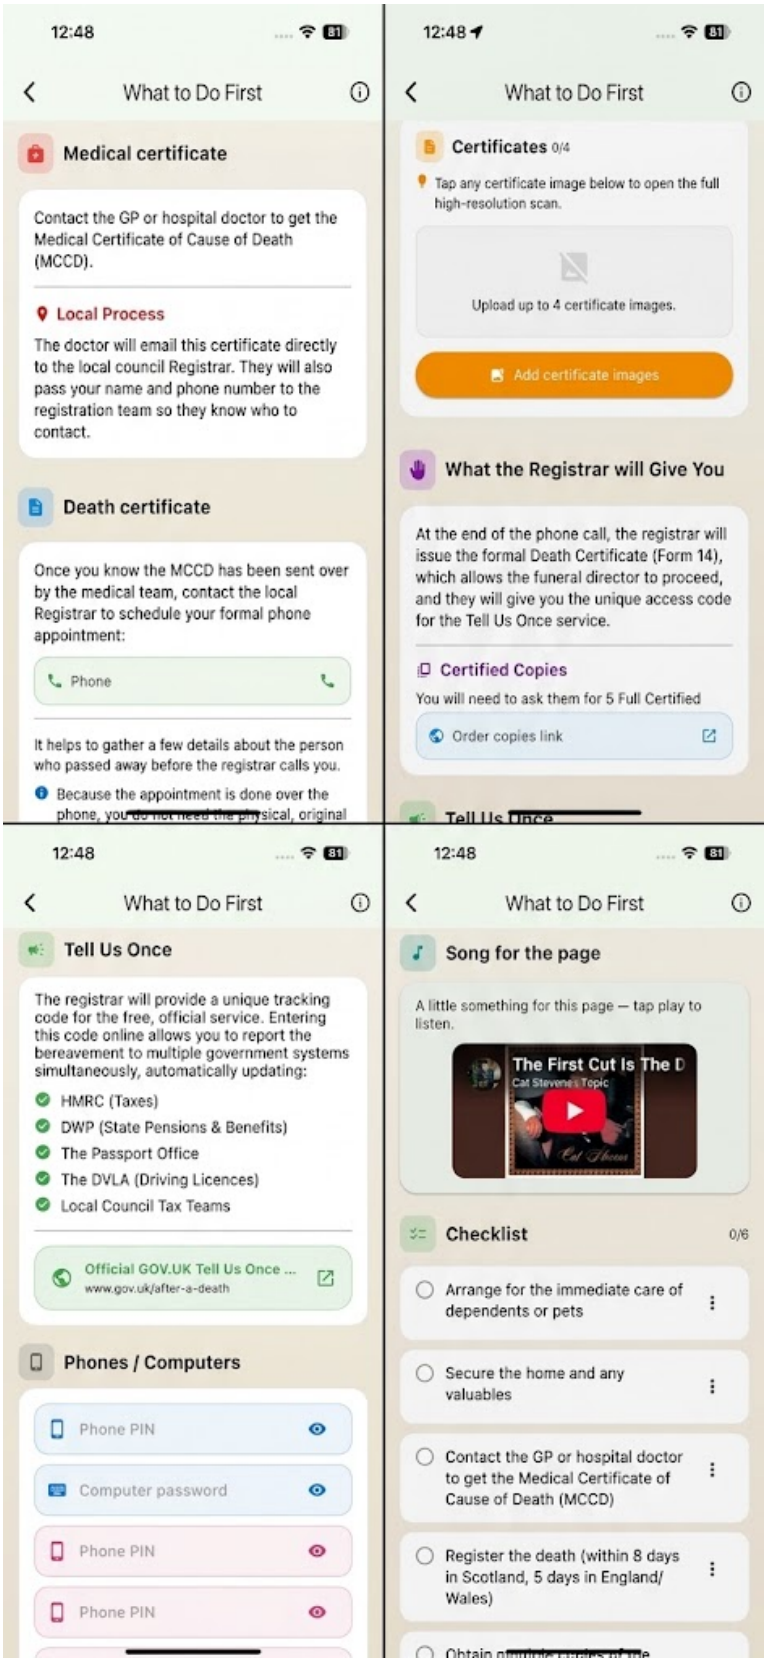

What to Do First(2)

NARRATION

Here are some steps your executors need to follow, starting off with looking after any pets you may have

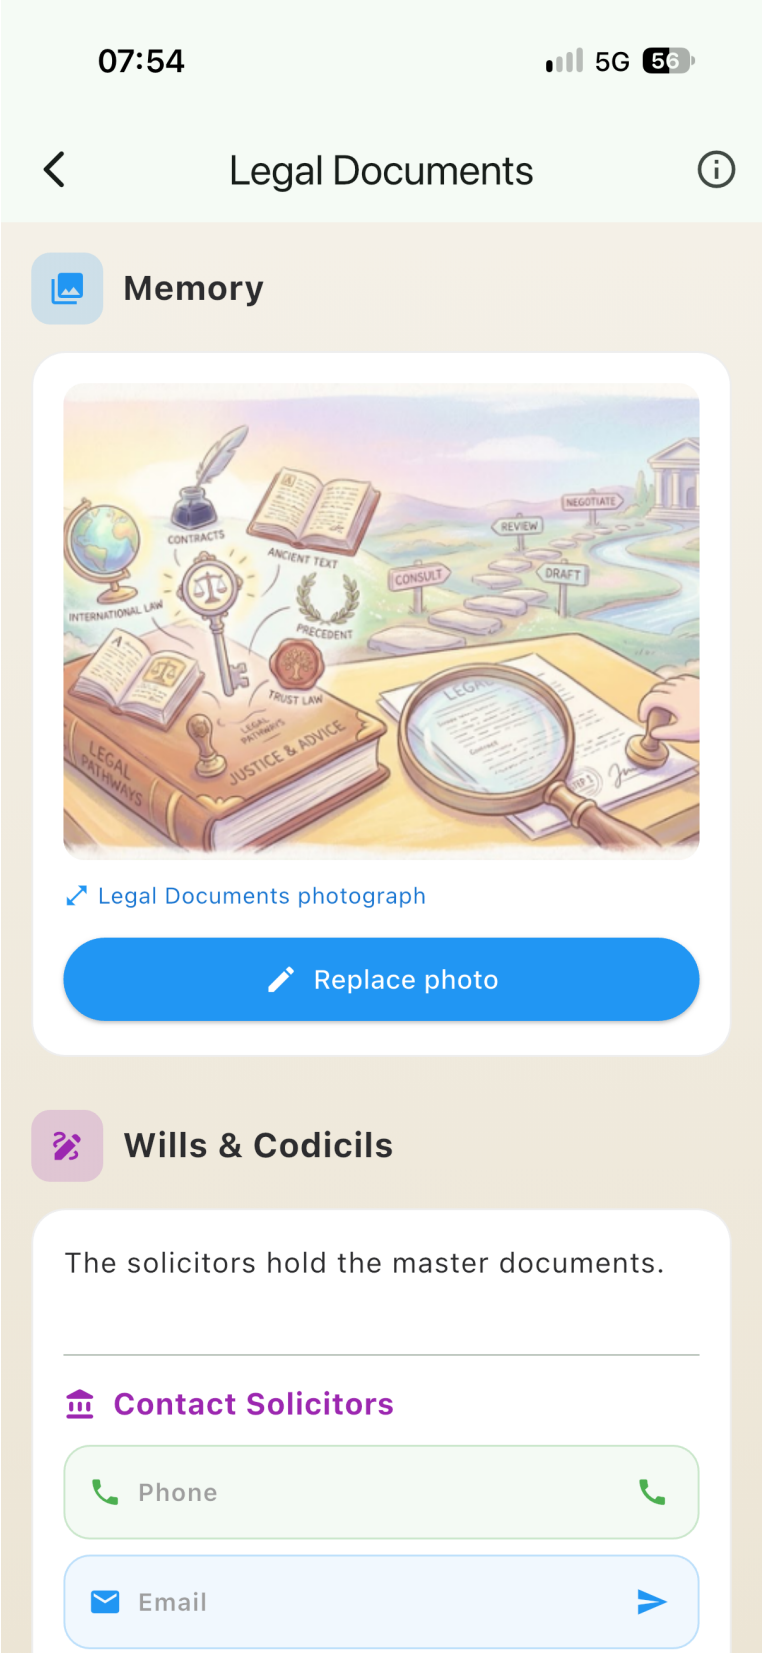

What to Do First (other steps)

NARRATION

There are steps here for medical certficate, death certficate and Tell Us Once. Plus a Song for the page and a checklist. Most sections have these two

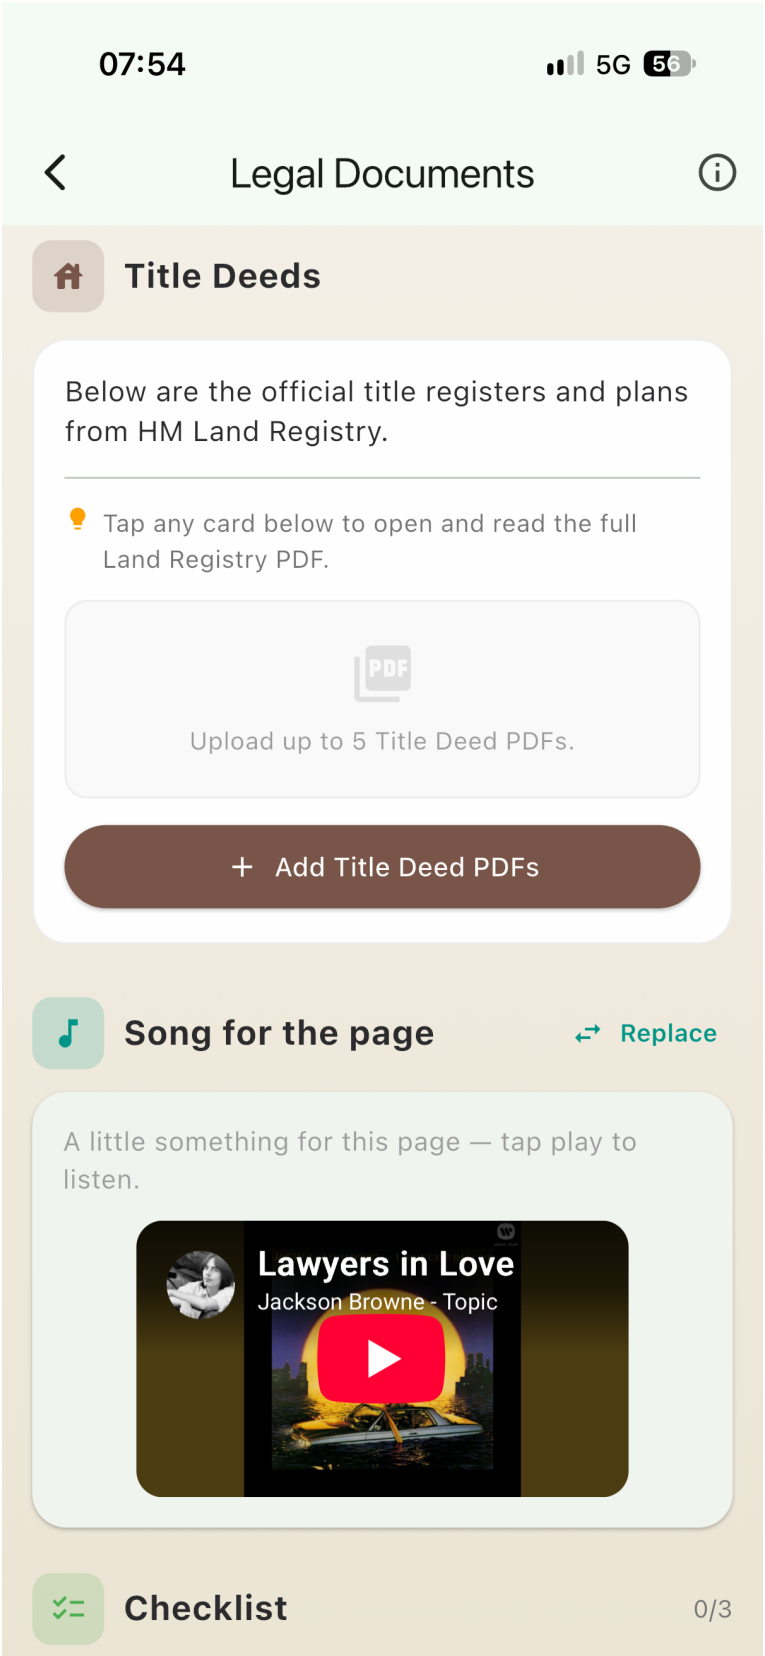

Legal Documents (1)

NARRATION

Here you can add copies of the wills

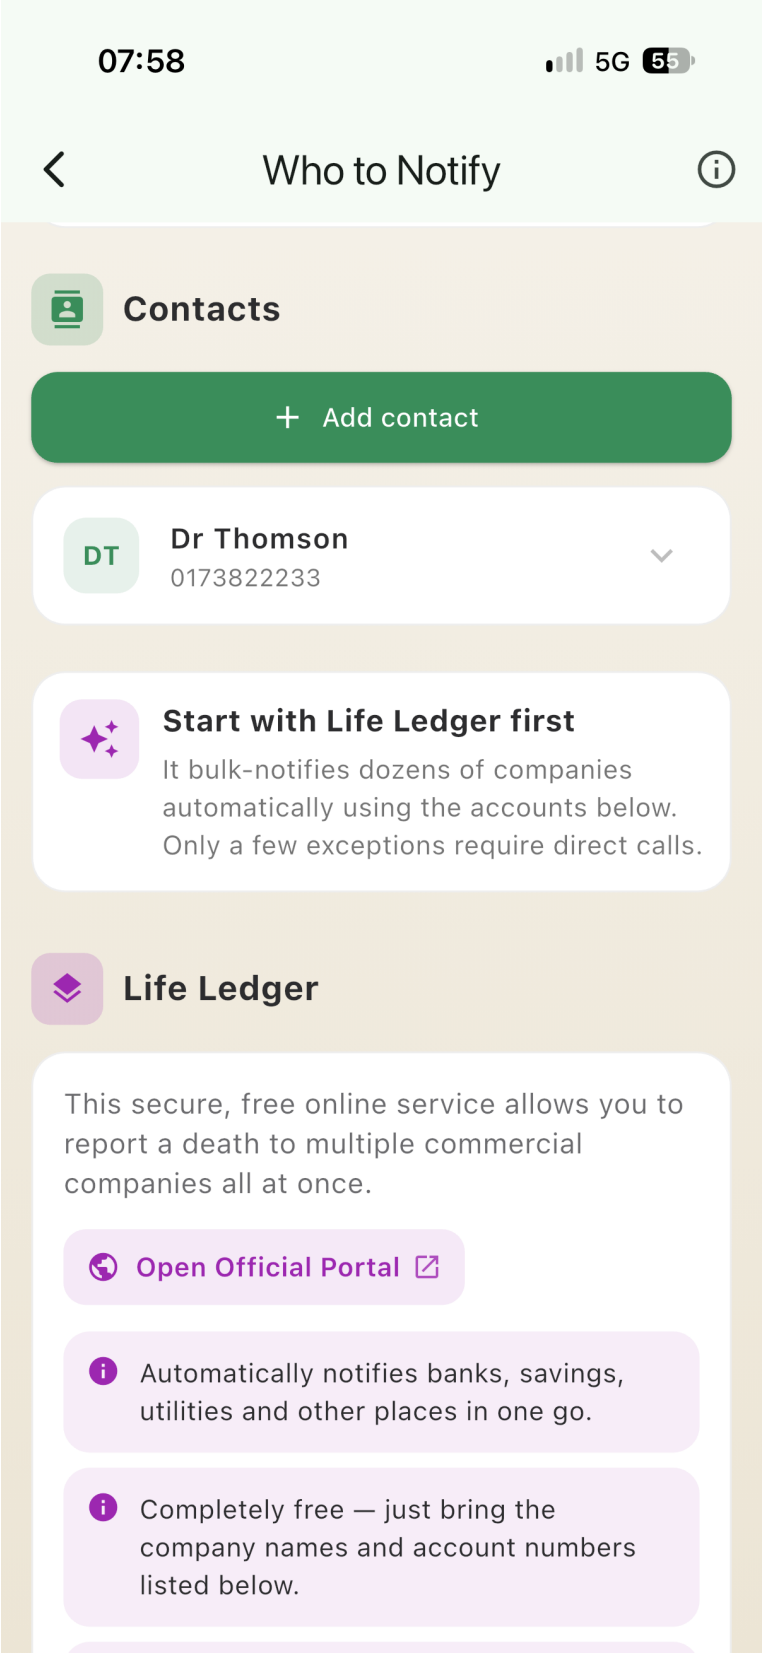

Legal Documents (2)

NARRATION

Additionally you can add your Title Deeds. There is also a checklist below the Song for the page

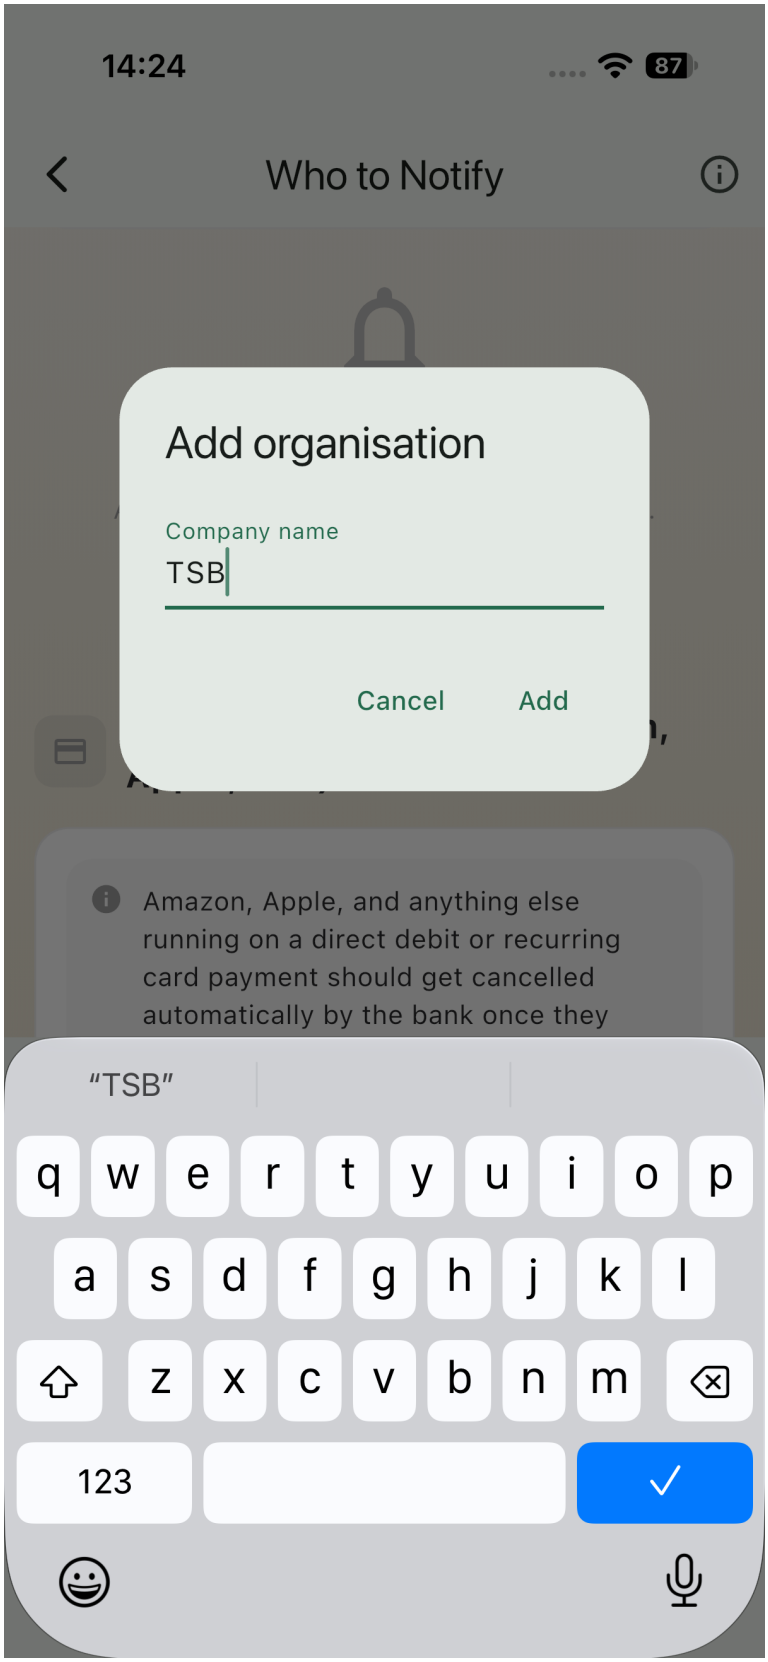

Who to Notify (1)

NARRATION

Add your contacts here of people you want to be informed - like family, friends, your employer or doctor. There is also information about Life Ledger, a free service you might find useful

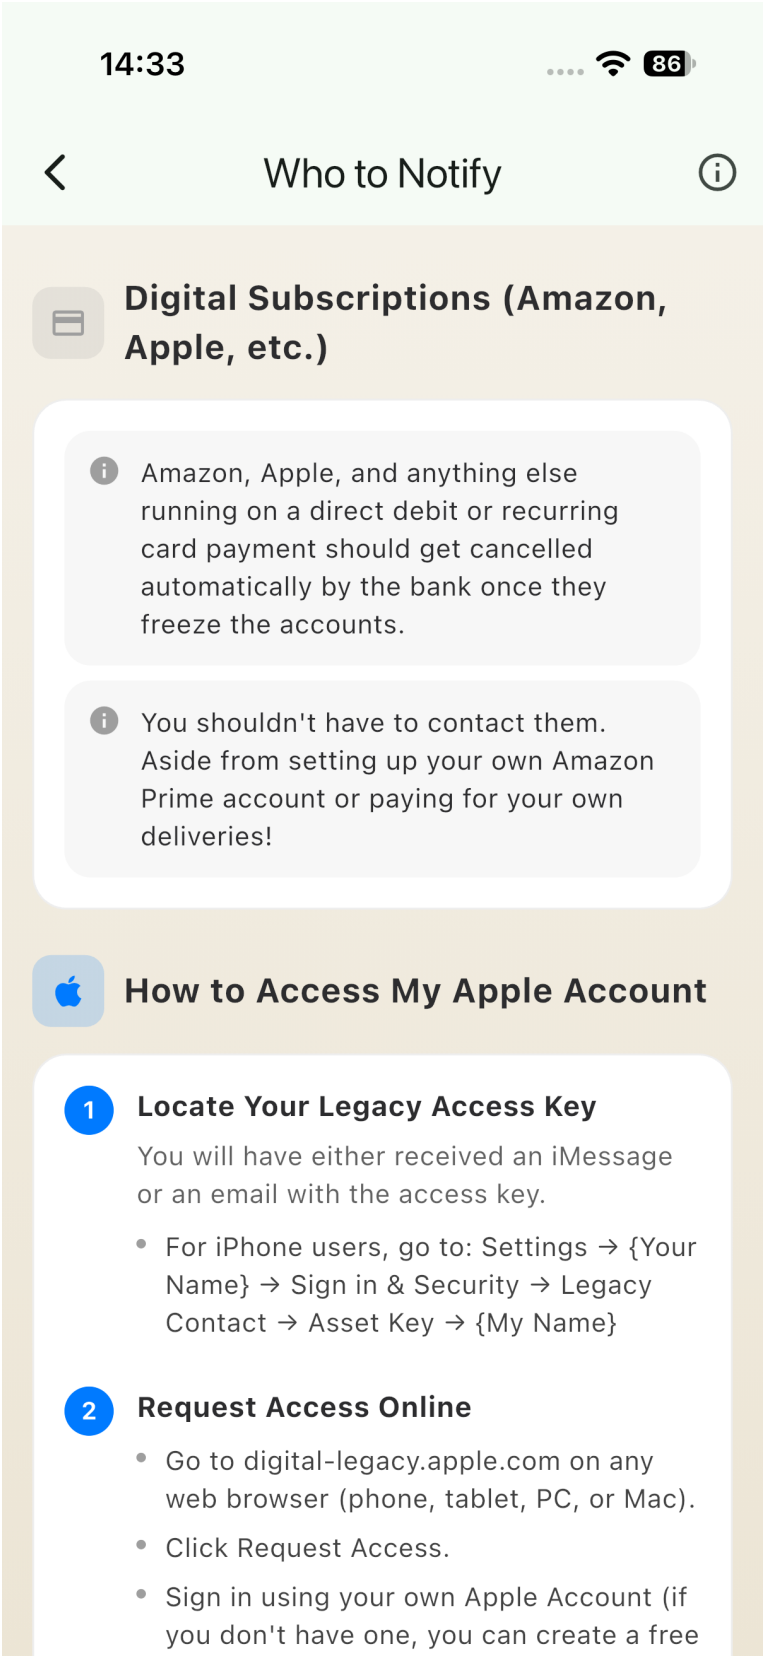

Who to Notify (2)

NARRATION

You can use the Add Organisation button to add key companies that may need contacting - like your bank

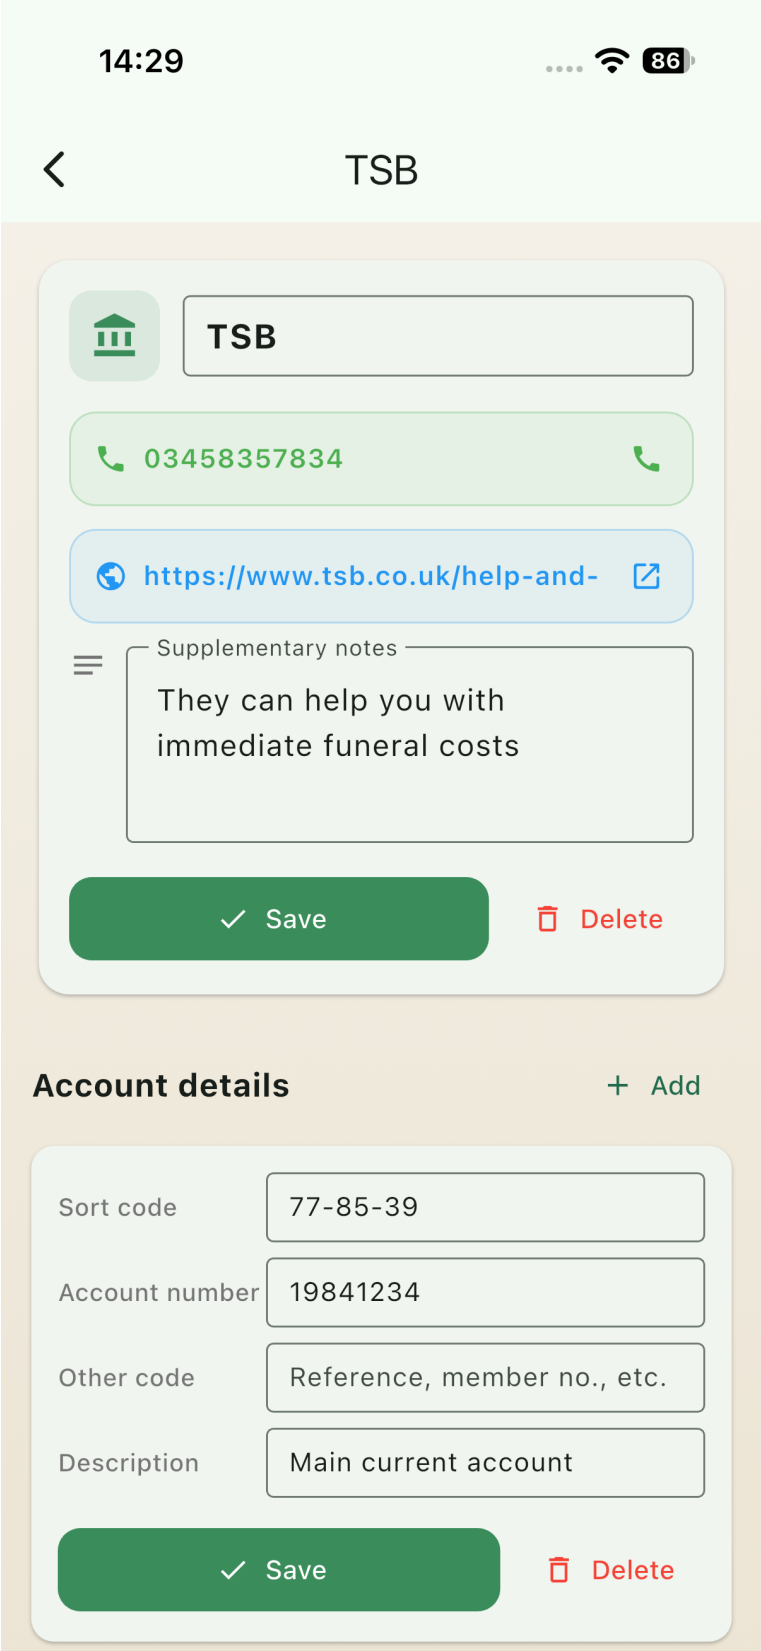

Who to Notify (3)

NARRATION

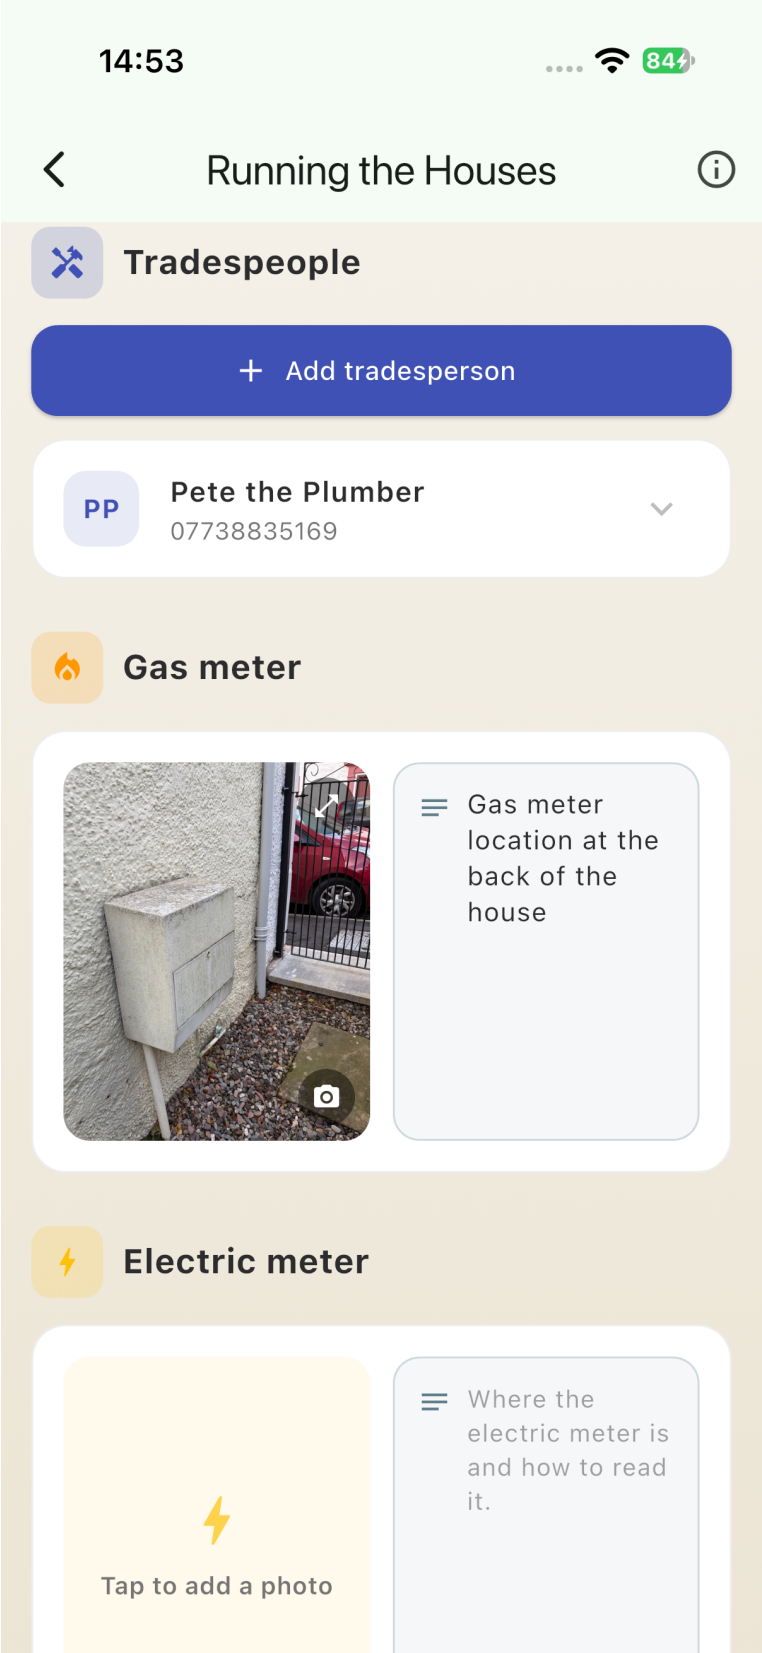

There is also information about digital subscriptions and Apple Legacy Access

Who to Notify (4)

NARRATION

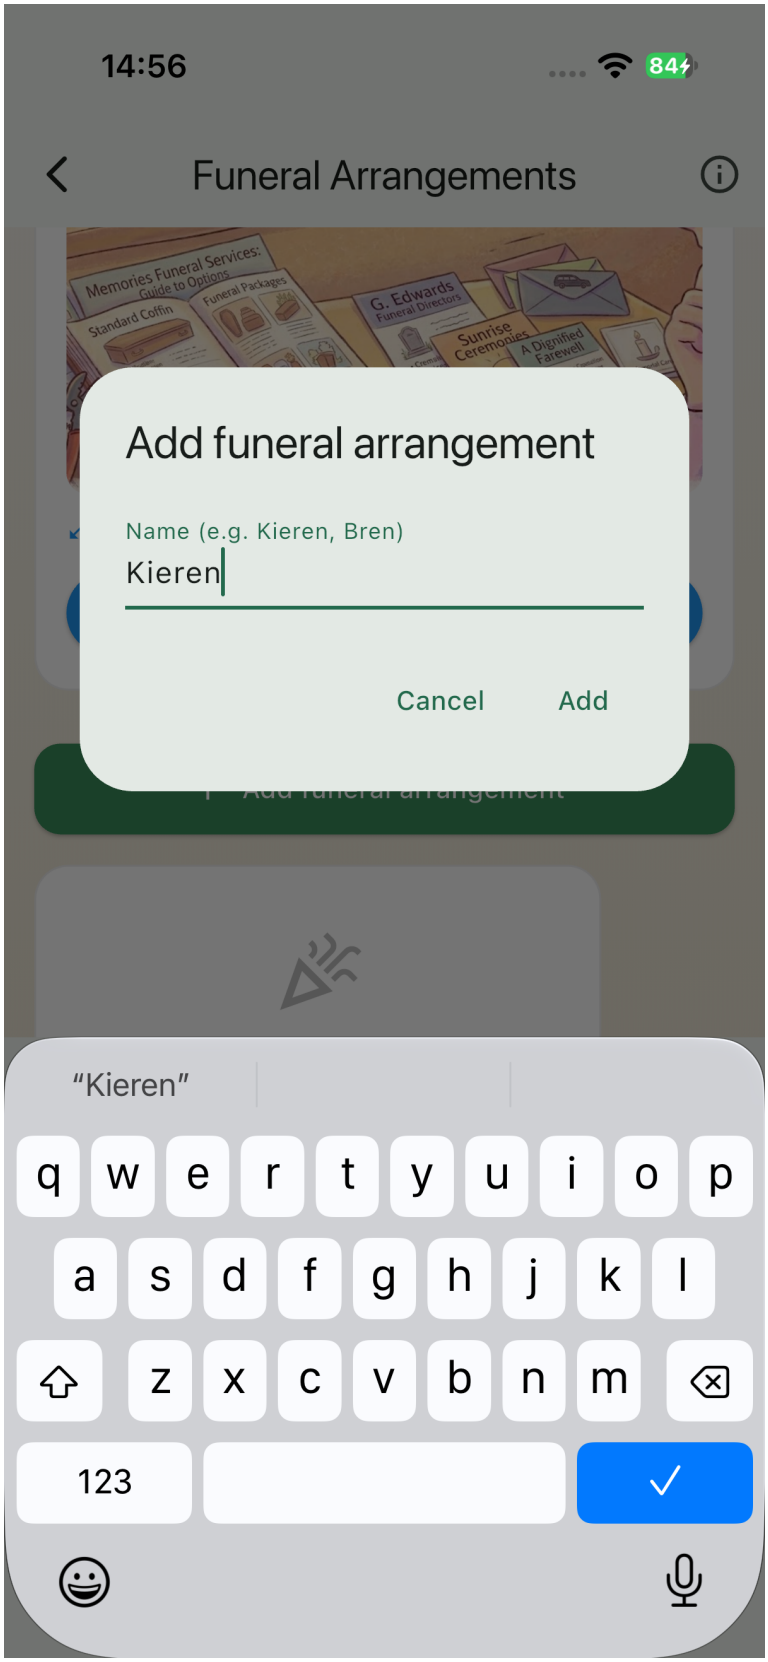

Once you have added an Organisation, you can add contact details / help pages and any accounts

NARRATION

Here you can add your favourite tradespeople, and useful information like gas and electrity meters, and the stopcock

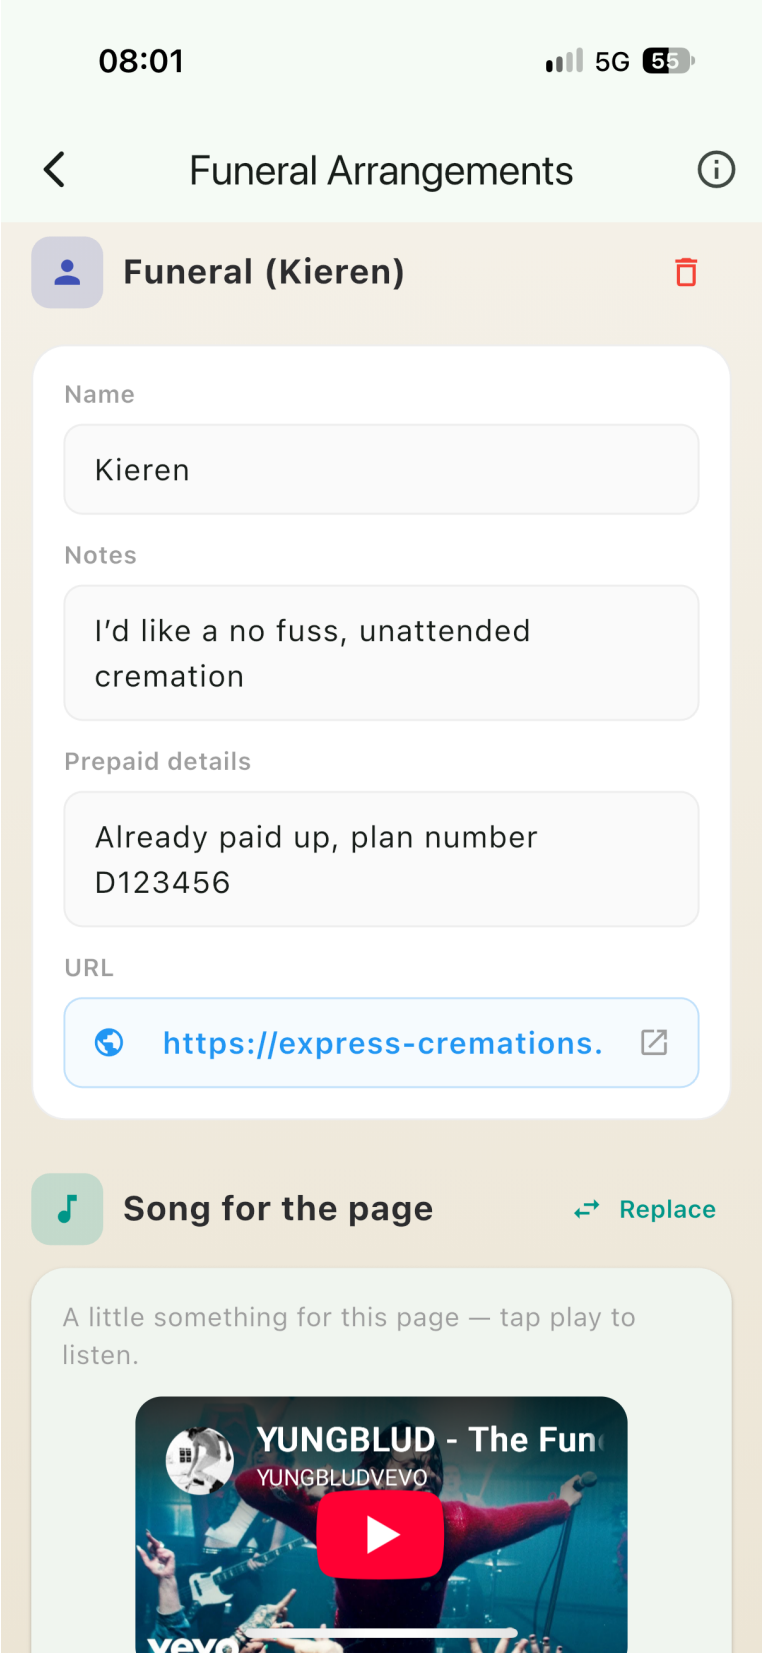

Funeral Arrangements (1)

NARRATION

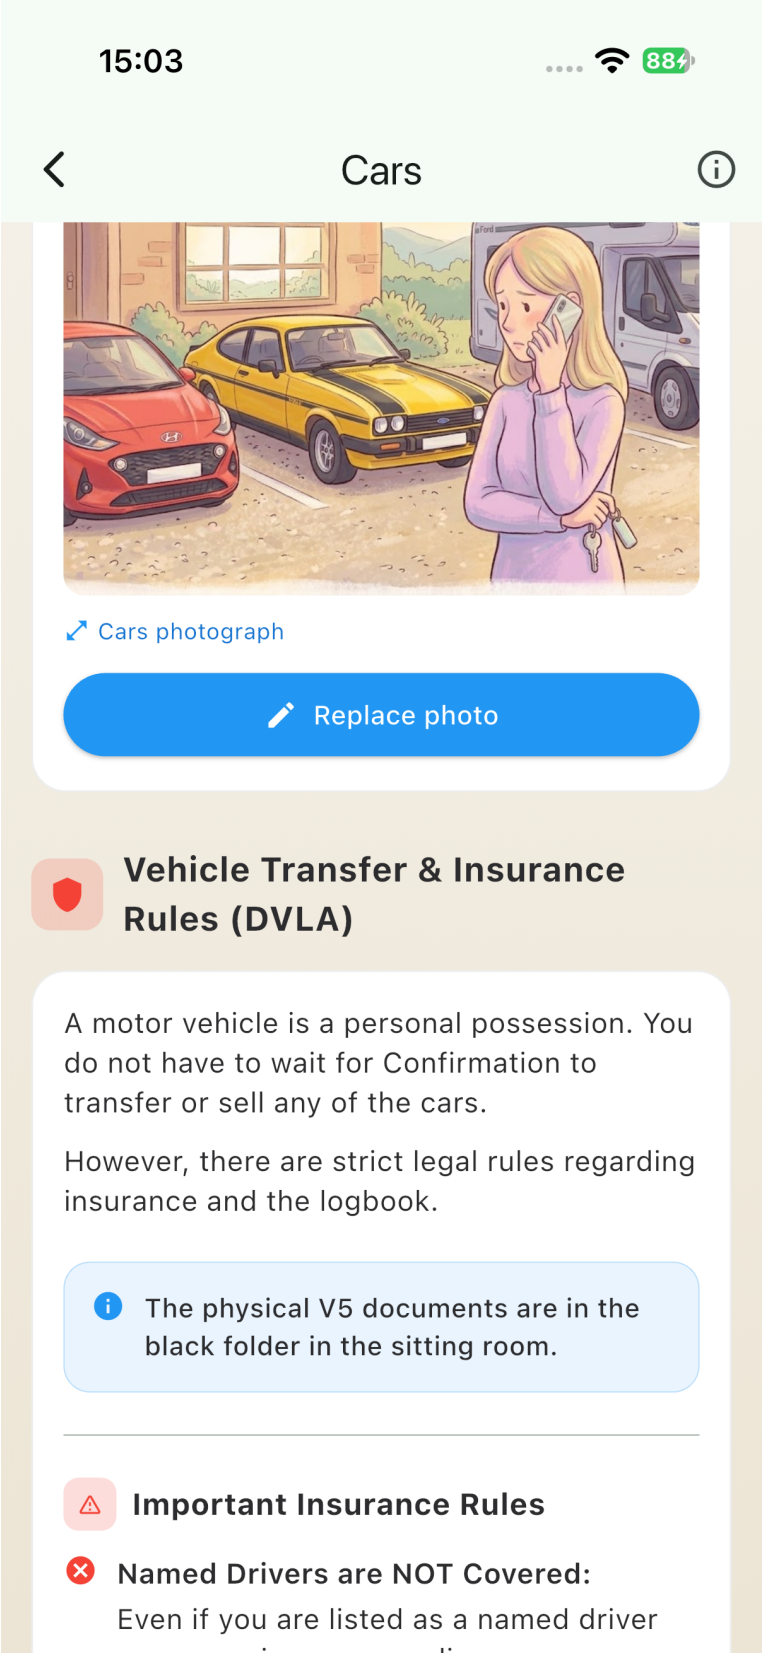

Here you can add funeral arrangements for everyone in your estate

Funeral Arrangements (2)

NARRATION

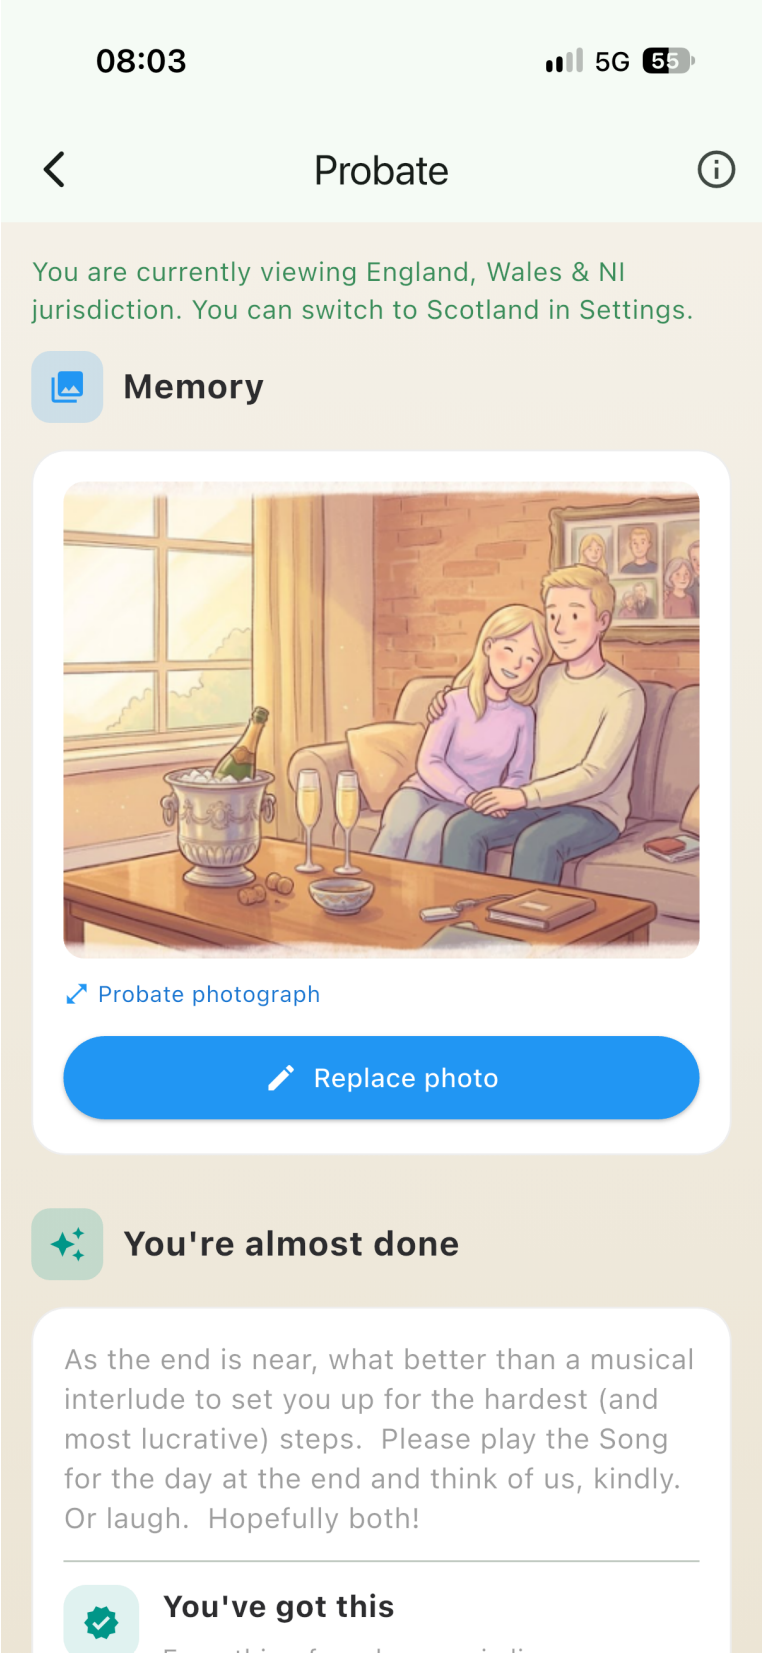

With detail such as your wishes, and any funeral service companies you might want to use

NARRATION

This section is useful information about what to do with the cars, in terms of notifying DVLA whether you keep or sell the car

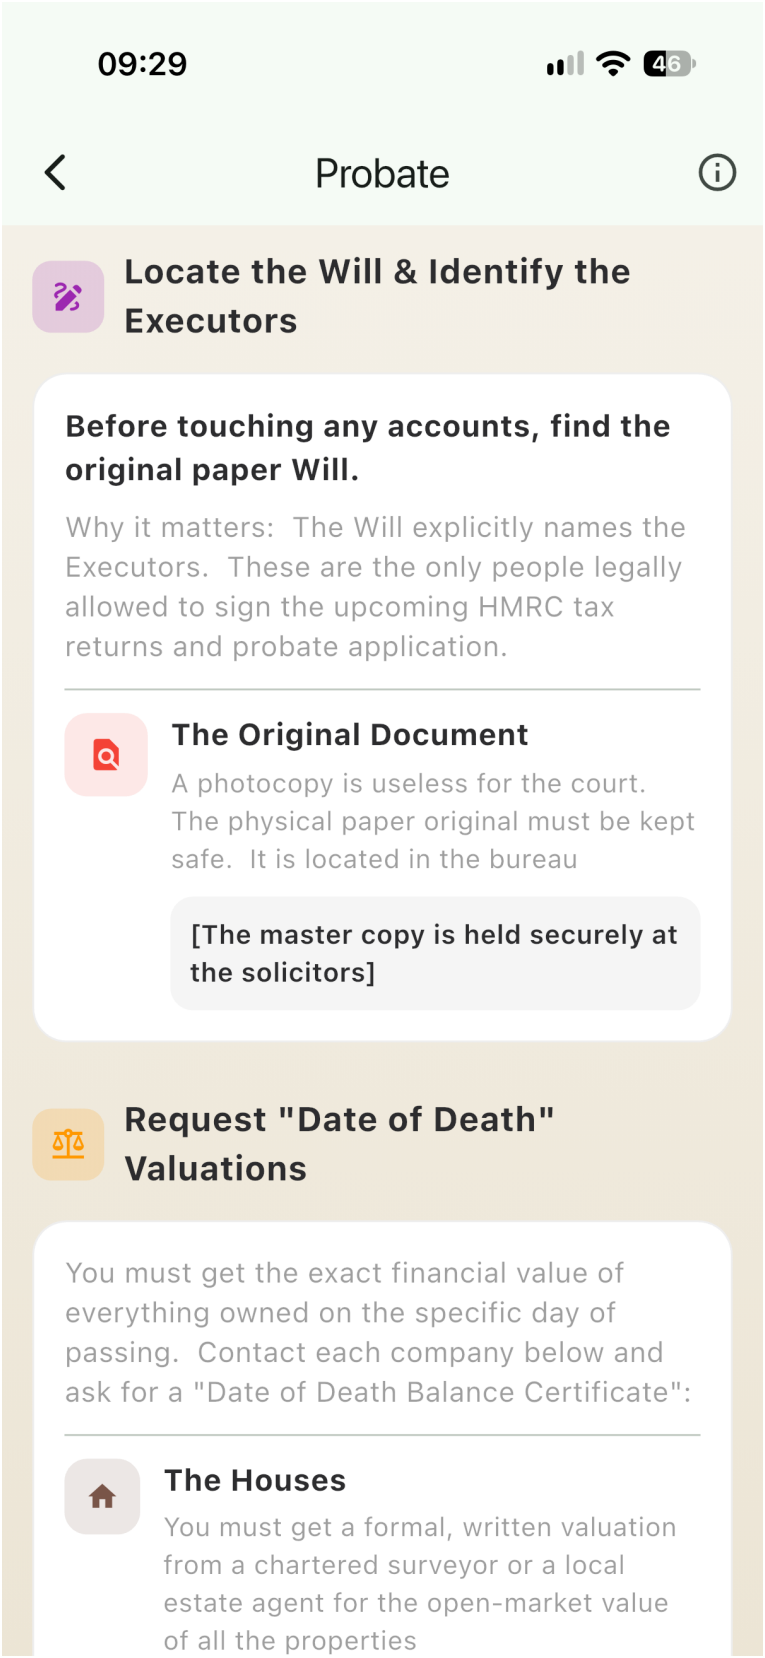

Probate (1)

NARRATION

Probate is the rather complicated process to tie up all the loose ends, notifying HMRC and others, to finalise the estate. You can switch to Scottish jurisdiction, where it is called Confirmation

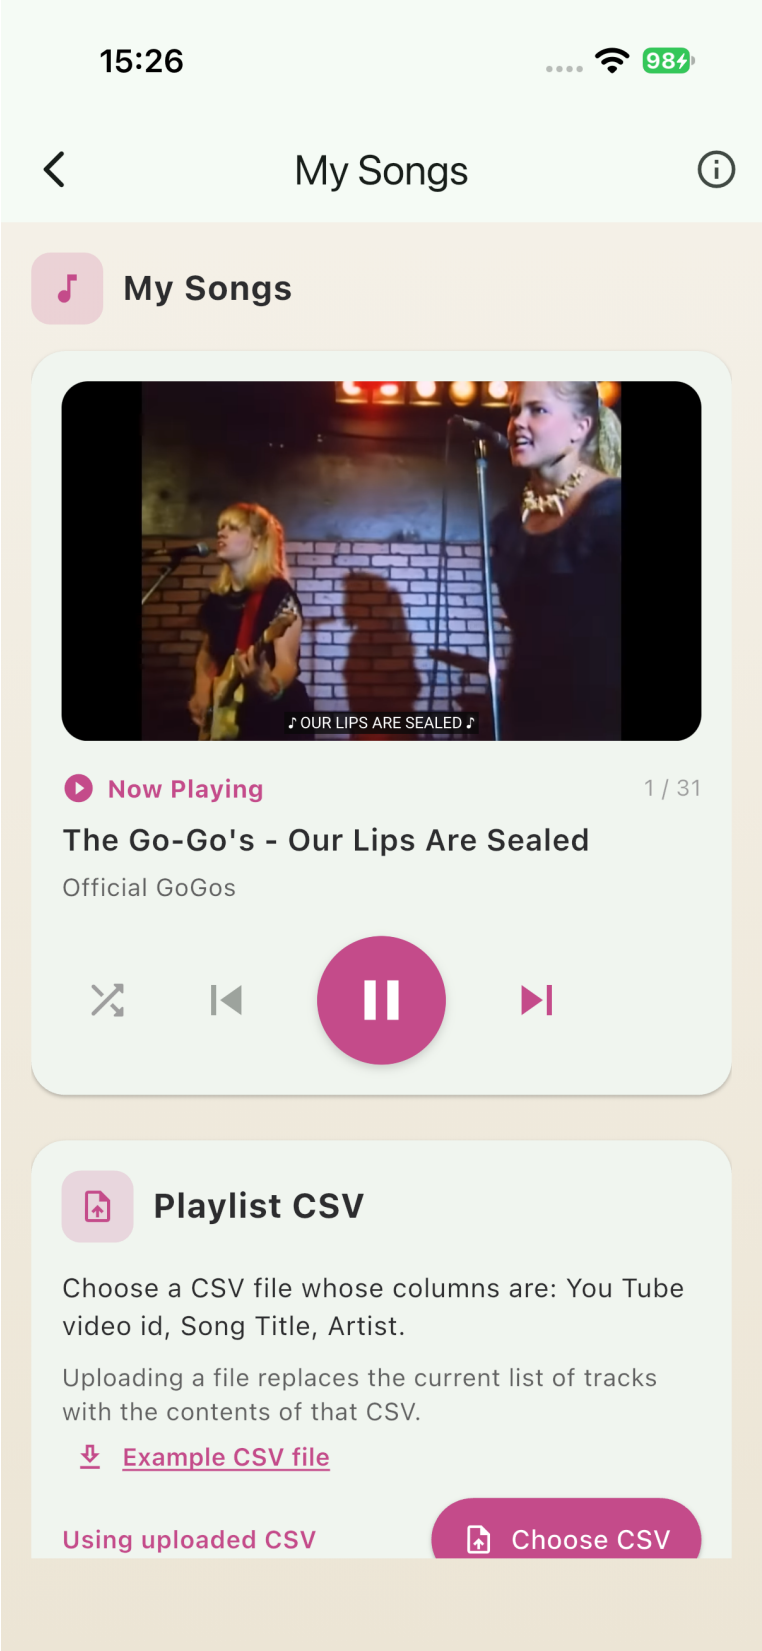

Probate (2)

NARRATION

There are several steps to follow, just an example here for brevity

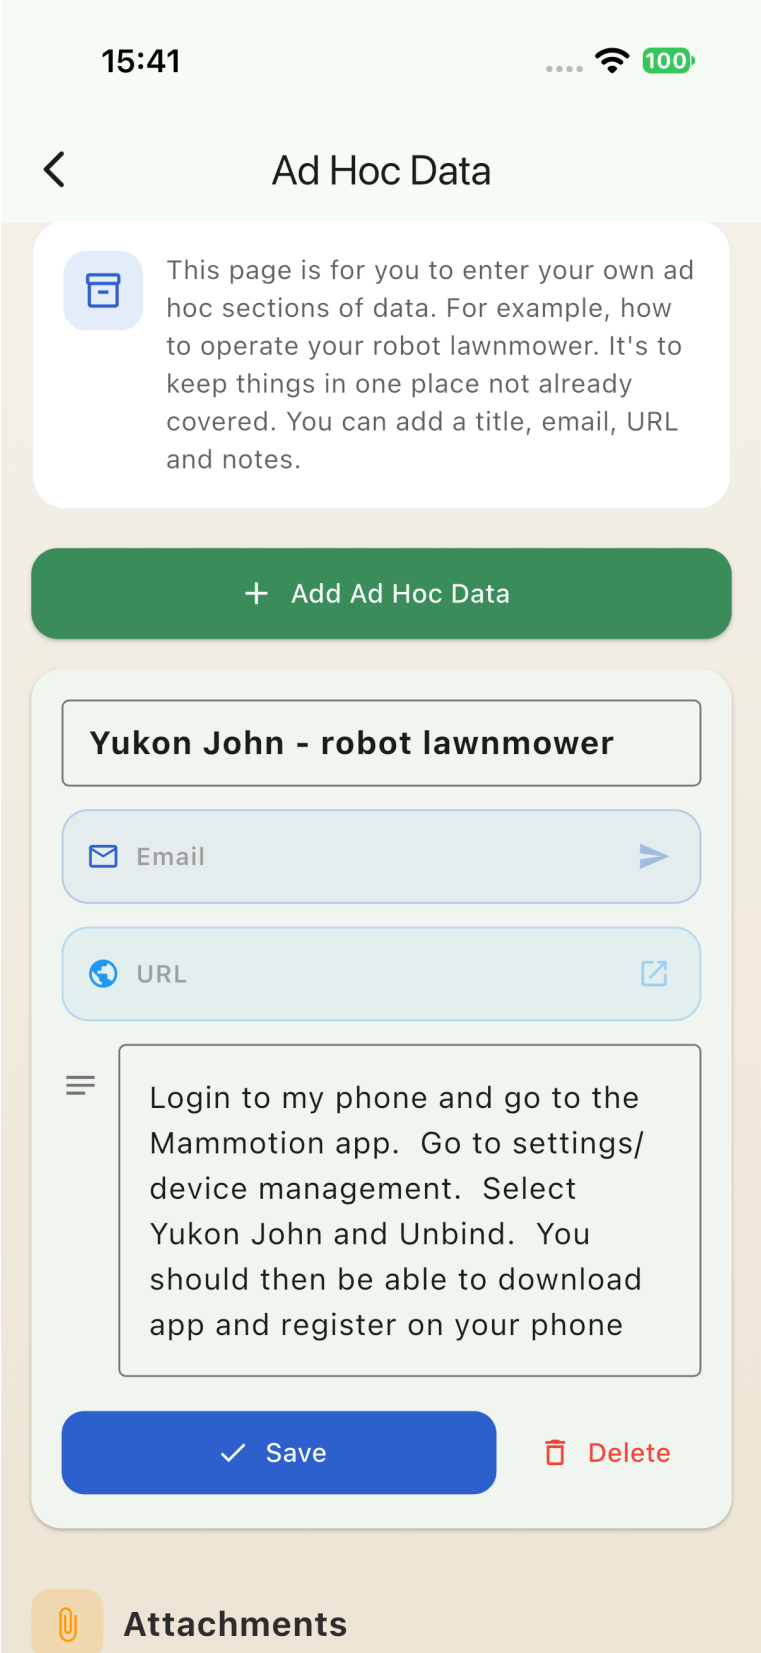

My Songs

NARRATION

This section allows you to import and play your own list of songs, maybe for your wake! There are tools online that can help you create the csv to import from YouTube and others

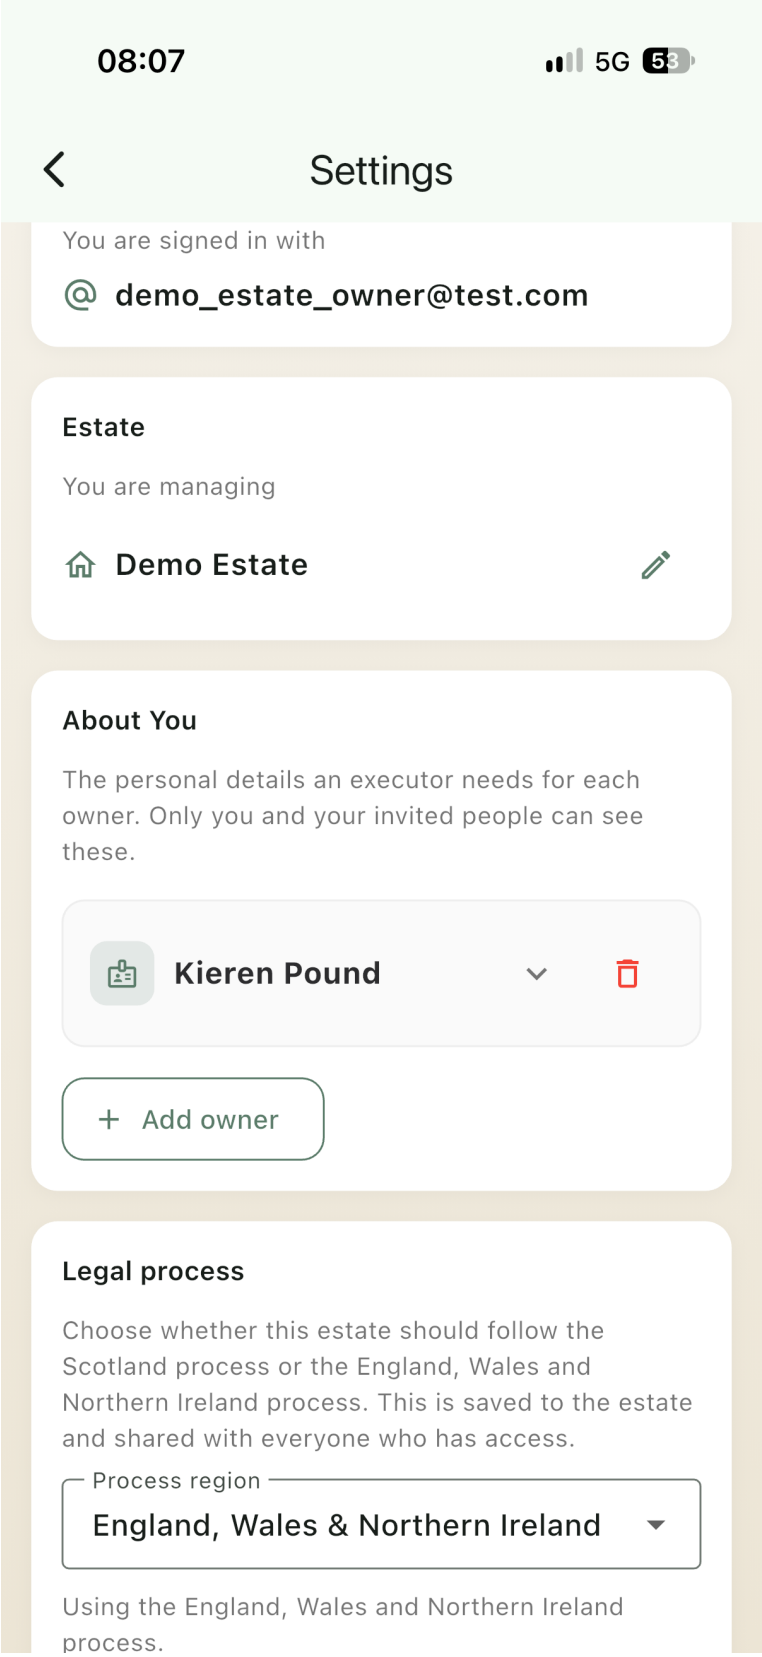

Ad Hoc Data

NARRATION

For anything else you want to store, like details of your robot lawnmower, you can add via Ad Hoc Data. You can add multiple Ad Hoc Data sections

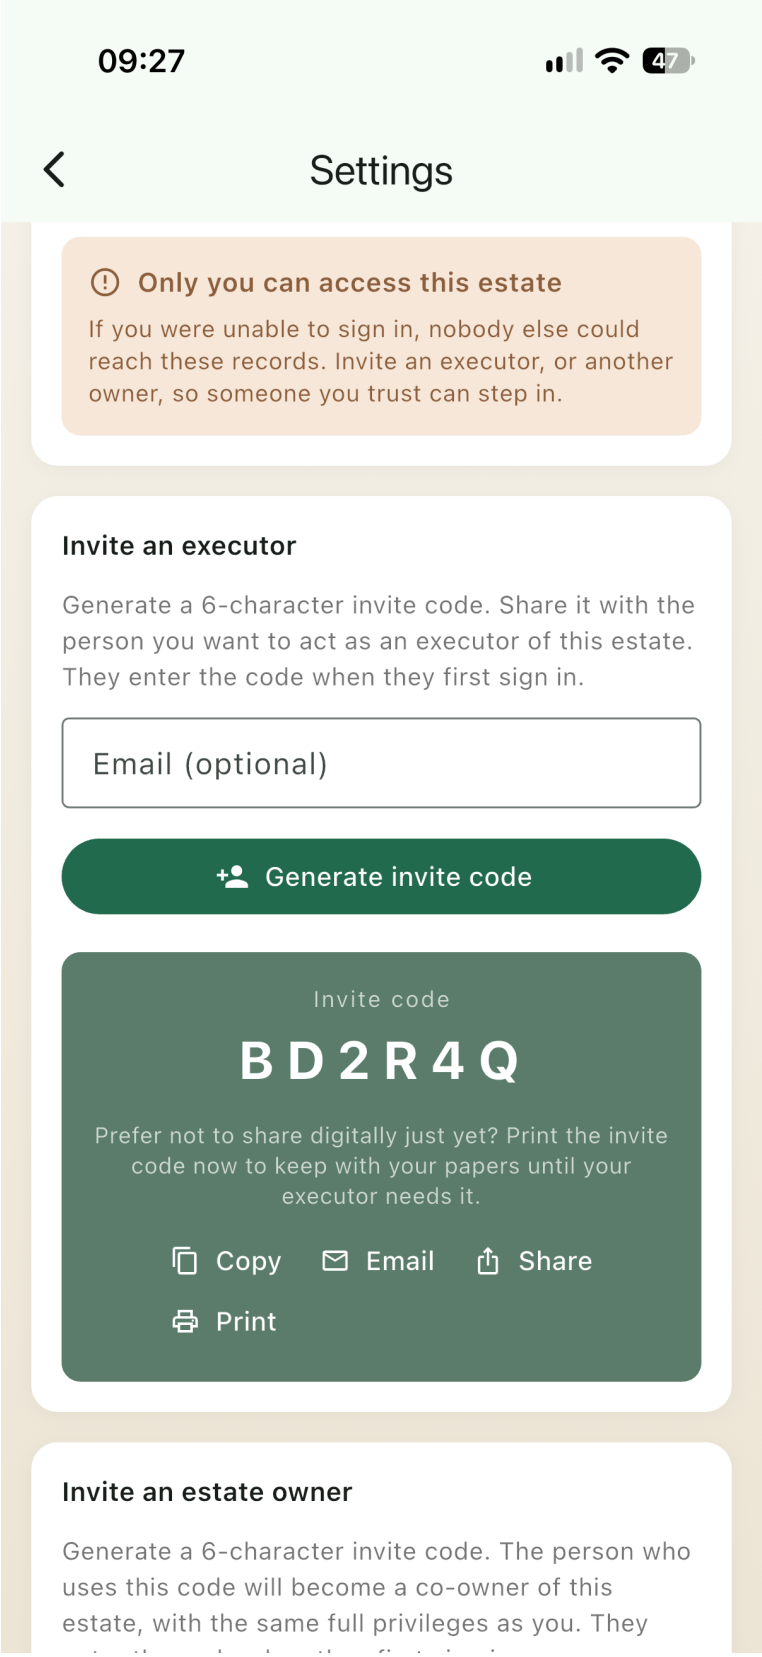

Settings (1)

NARRATION

In Settings you can configure items. Here you can change the estate name, turn on biometrics like face id and see what the app looks like for your executors

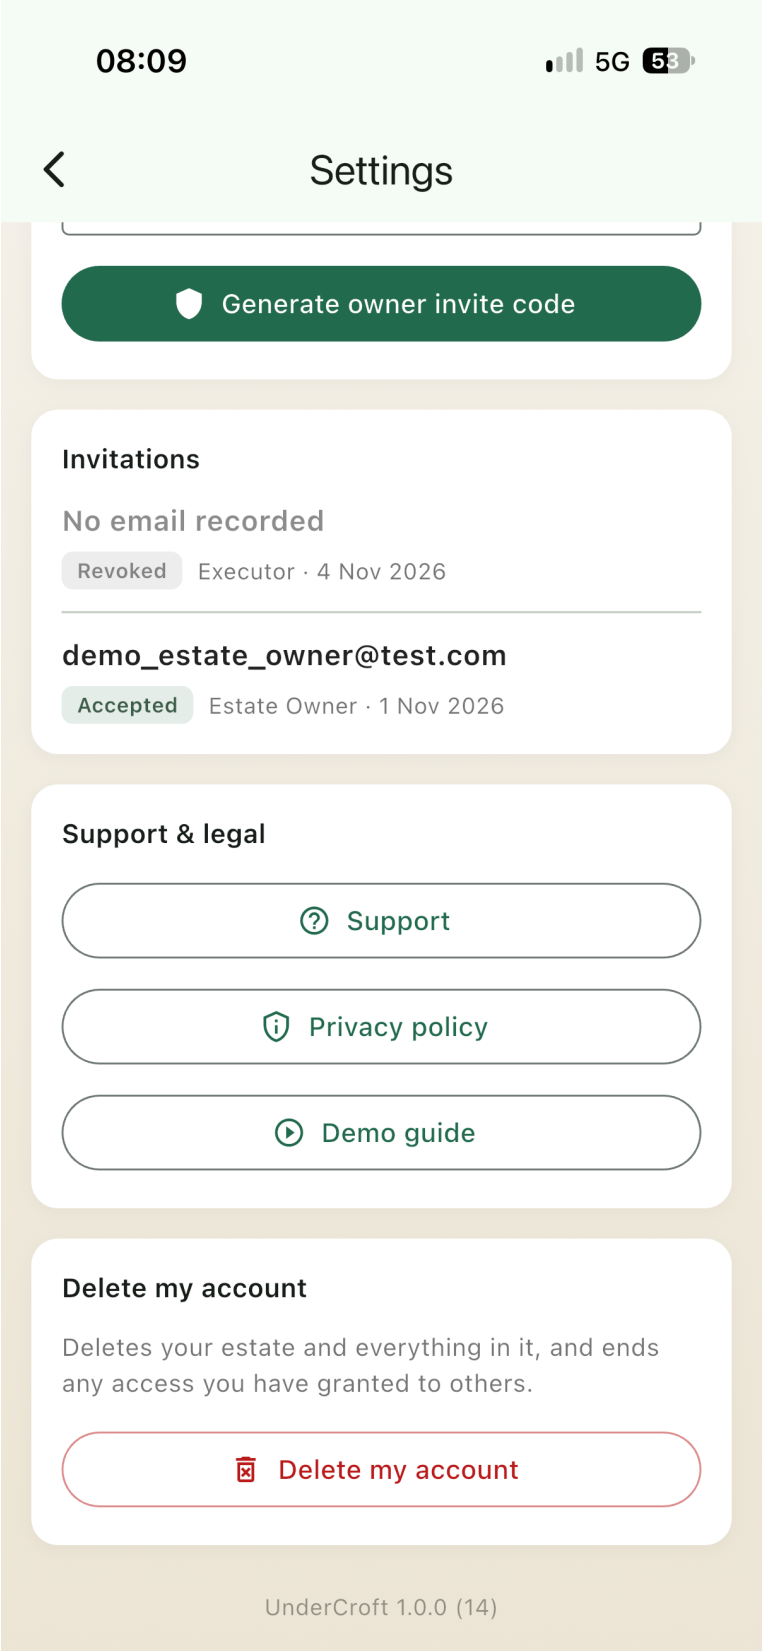

Settings (2)

NARRATION

Further down, your readiness is shown. You can invite executors and another estate owner. The invite can be sent via copy, email, share or print

Settings (3)

NARRATION

Here you can read the privacy policy, or raise a support ticket. And if you don't want to use the app anymore, deleting your account will delete all the records in your estate, including any executors and other estate owners. Everything is securely removed
