Unable to enter Pet Insurance

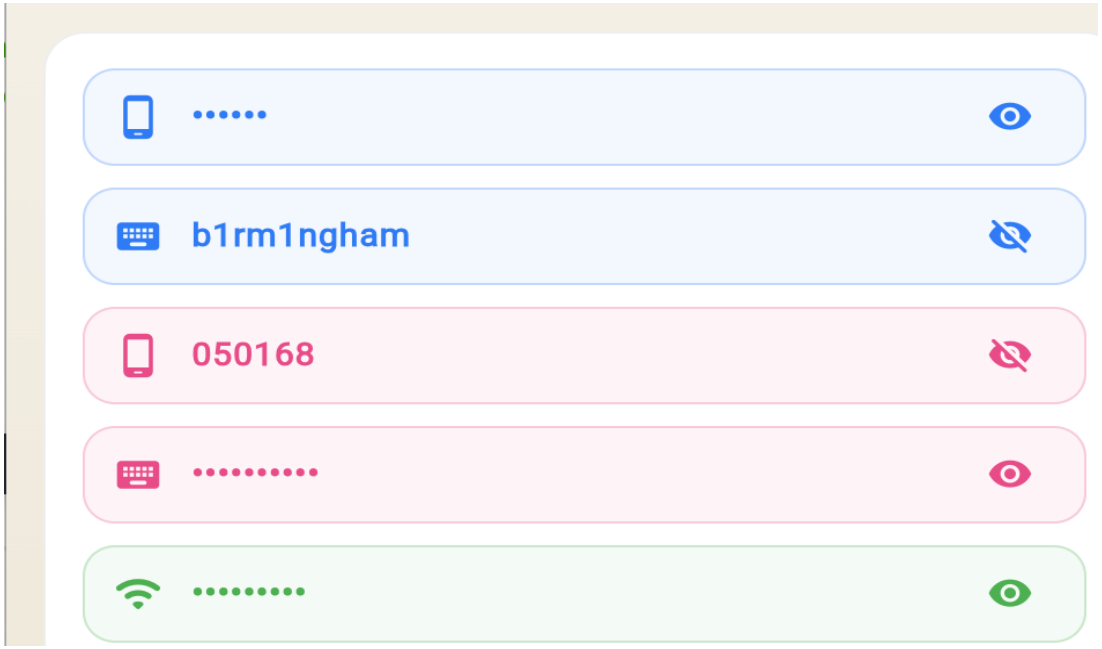

I think you might have selected Executor mode in settings - this makes the app read only

Phones / computer

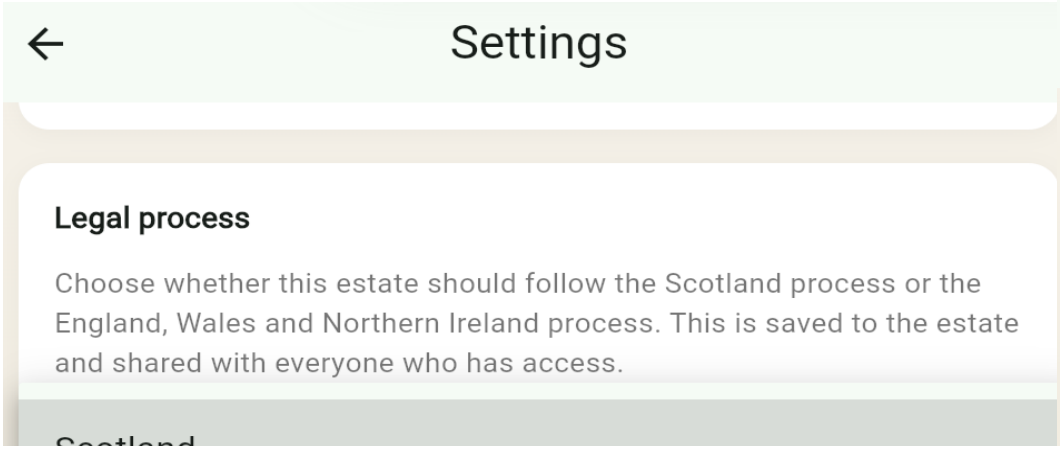

I didn’t have any issue typing in here, is this the section you meant had a problem, For info, yiu can mask or unmask the entries

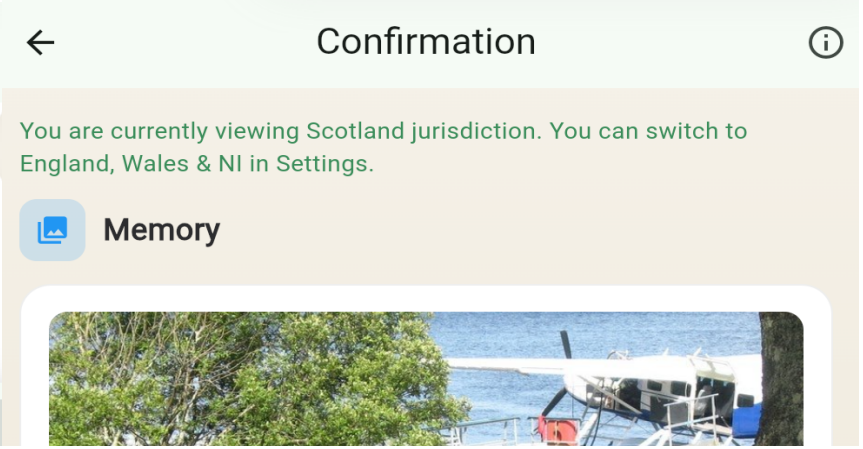

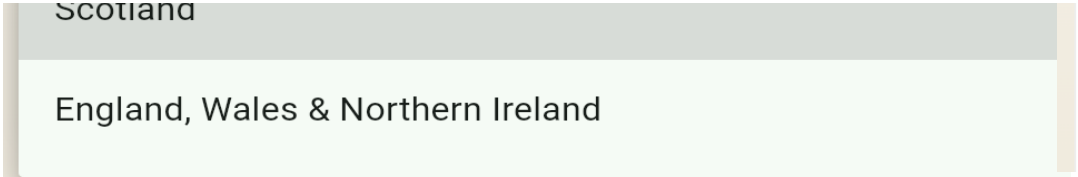

Jurisdiction

You can select this in Settings. If youn ad Executor mode on earlier you would be able to change it. It reminds you where to change it in Confirmation

I have changed the text in Legal Documents to reflect HM Land Registry if the jurisdiction is England

Notify page

I have made some changes to stop thibgs jumping around, must have missed this. I presume yiou were in the Add Contact bit

Car section

I've added some text. My new old car had abouyt 7 phones in it!

My songs

Actually this bit was more for fun. The idea being you could curate your own list for your wakr. Mine was from songs I shazamed in the pub
There is some text in the info section
